

Midwest Engineering

Associates, Inc.

Construction Management Services

Midwest Engineering Associates, Inc. has the skill and expertise to coordinate your construction and energy improvement projects, ensuring that they are completed successfully, on time, and within your projected budget.

From project planning to completion, Midwest will manage every aspect of the building process, including:

- **Strategic Planning.** Midwest will work with you to identify and define objectives, schedules, budgets, and deliverables.
- **Design.** Midwest's engineers will work to provide your organization with a design that meets your financial, operational, and aesthetic needs.
- **Materials Selection and Procurement.** Midwest works with clients to determine which materials fit best according to budgetary constraints. Local, sustainable building materials are used whenever possible.
- **Project Coordination.** Midwest works with clients to ensure that project deliverables are met from the design stage through project completion. Our team will work with you to ensure that every aspect of the project is carried out to your specifications.
- **Project Completion.** Midwest's expertise with time management, cost management, and quality management will ensure that the project is completed on time and in accordance with your organization's budget.
