

Midwest Engineering

Associates, Inc.

Facilities Group

Midwest Engineering Associates, Inc. knows you outsource for many reasons — cost, quality, accountability. That's why you select the team that fits the best.

Adapting our expertise to your culture is what Midwest Engineering Associates, Inc.'s Facilities Group does best. Organizational knowledge, long-term planning, facility expansions and renovations, utility upgrades, preventive and predictive maintenance, performance optimization — all are integral to a safe, efficient and cost-effective operation. But, attending to those needs can divert valuable resources away from your primary concern — your core business.

Midwest Engineering Associates, Inc.'s Facilities Group can provide you an engineering staff that has the concept, optimization and design expertise, construction experience, and organizational and operational knowledge to plan and execute all of your facility projects.

Midwest Engineering Associates, Inc. provides professional design and consulting services tailored to our client's building envelope needs. Our Engineering, Consultant, and Maintenance Programming services get behind each client with consistent customer service and proven field experience.

Midwest's Facilities Group specializes in resolving the challenges our clients face in managing and operating their existing facilities. Our focus is on facility asset management and involves the organizational structure, dynamics of the FM organization (the people side), and the physical assets of the organization (the physical side).

Our mission is to provide our clients with tools to help extend the service life of existing facilities and building systems. Midwest Engineering Associates, Inc.'s client-centered culture thrives on communicating effectively with our clients and making their success our priority.
