

Midwest Engineering

Associates, Inc.

Mechanical Engineering Services

Midwest Engineering Associates, Inc.'s Mechanical Engineering division provides HVAC, plumbing, fire protection and LEED expertise to the public, private and military sector. Our Professionals have extensive and diverse experience capabilities acquired while completing over 800 projects, allowing the Firm to handle large projects. A large segment of the practice is dedicated to solving Owner's special requirements and problems. Principals, possessing strong backgrounds in design and construction administration, lead in developing in-house systems to provide superior project quality control and implementation.

MEP projects include: work for Educational Facilities, Classroom Buildings, Offices, Municipalities, Courts, Police Facilities, Fire Stations, Jails, Prisons, Libraries, Dormitories, Kitchens, Religious Facilities, Hospitals, Simulators, Museums, Galleries/Exhibit Halls, Performing Arts Facilities, the Military, both new and renovations. Other projects include those demonstrating special controlled environments, specialized Owner requirements, and special security design capabilities.
